1. On 15 July 1964, Messrs. [redacted] visited with Mr. James L. Harrison, Public Printer. The purpose of the visit was to have [redacted] meet Mr. Harrison and, in the course of the visit, to brief Mr. Harrison on the Agency's proposed new printing plant. Mr. Harrison has had a long interest in the Agency's printing problems as a result of his previous service as Staff Director of the Joint Committee on Printing (JCP). In his JCP capacity, Mr. Harrison had, on numerous occasions, strongly recommended that the Agency consolidate their printing facilities in the Headquarters area. When informed of the Agency's plans to construct a printing plant on the Headquarters site at Langley, Virginia, Mr. Harrison expressed pleasure and offered the help of the Government Printing Office to assist with the planning.

2. On 16 July 1964, [redacted] met with Mr. John F. Haley, Staff Director of the Joint Committee on Printing, to discuss progress on a number of printing matters. Mr. Haley was briefed on the work which the Agency is doing on the computerized typesetting program and was told that the Agency has ordered a 513 Photon machine to do the typesetting in this program. He was also briefed on the progress made in converting the [redacted] reports from mimeograph to offset printing. He expressed interest in both of these programs and said that he was quite pleased that the Agency is progressing in both of these fields. He asked to be kept advised on the progress the Agency makes on computerized typesetting.

STAT

[redacted] then told Mr. Haley that the Agency is beginning plans for

the construction of a building on the Headquarters site at Langley, Virginia, to house its printing facilities. Again, Mr. Haley expressed his approval of Agency action. Mr. Haley is familiar with the Agency's printing situation and has, on a number of occasions, expressed his opinion that these printing facilities should be consolidated in a single building.
